

STEP BY STEP
WINDOW TINT GUIDE

TUTORIAL

DROP GLASS CUTTING

*Recommended be used in conjunction with the full in-depth video tutorials where we break down each method used in more detail

TINT SCHOOL ONLINE

TOOLS NEEDED

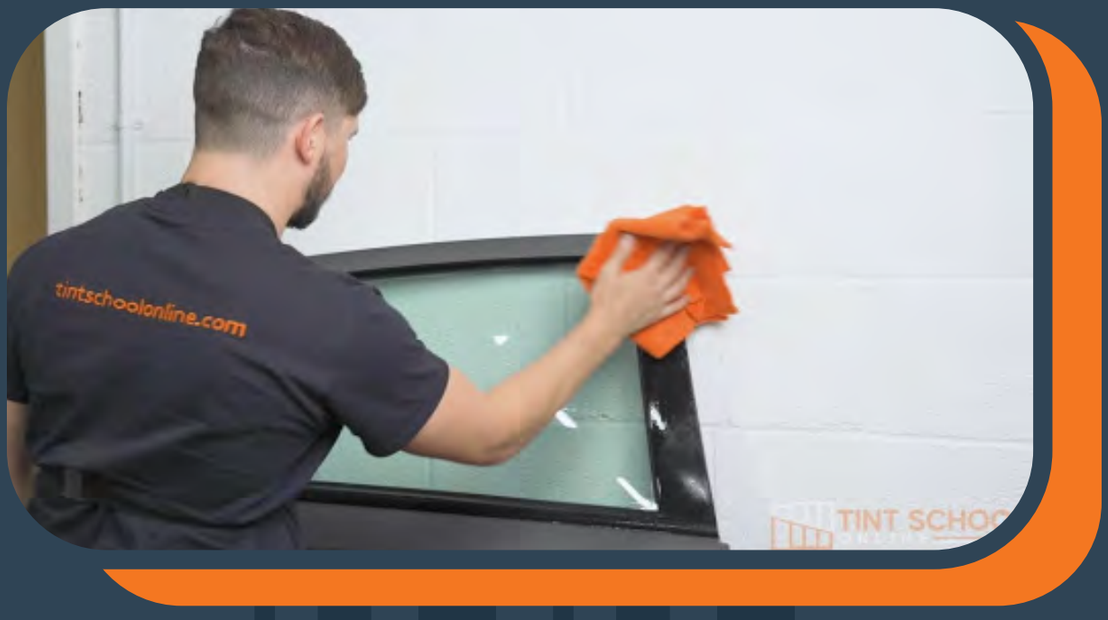

- Spray Bottle
- Window Cleaner
- Cloth
- Knife
- Roll of Film
- Hard Card

TINT SCHOOL ONLINE

Step 1

Clean the panel
and the window

TINT SCHOOL ONLINE

Step 2

Lay the film leaving ½ inch straight gap on the bottom

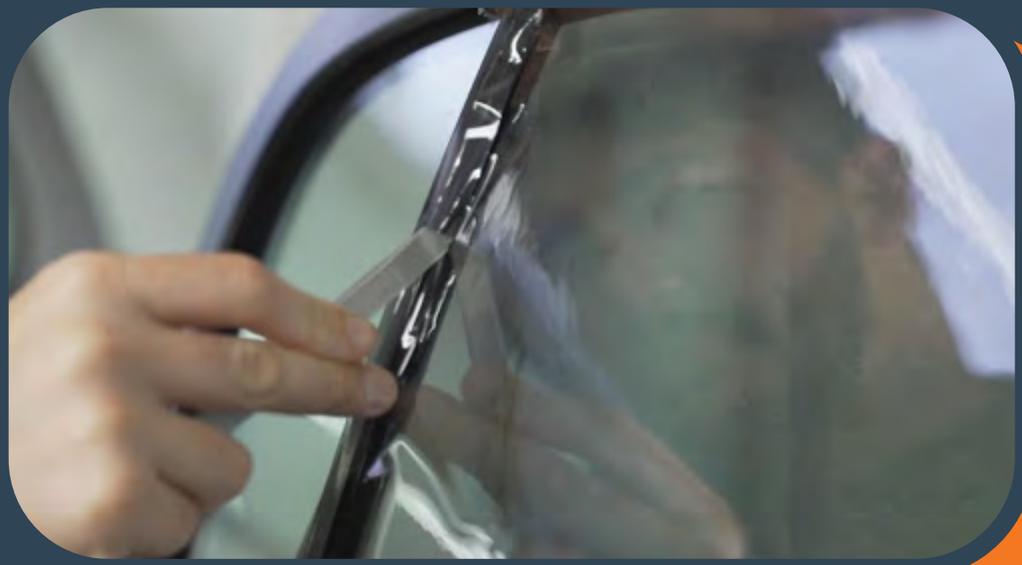

End Goal

By the end, we aim to overlap the film by ½ cm each side, ½ inch at the bottom with a slight gap at the top

TINT SCHOOL ONLINE

Step 3

Cut one side of the film and then overlap that side by 1 cm

TINT SCHOOL ONLINE

Step 4

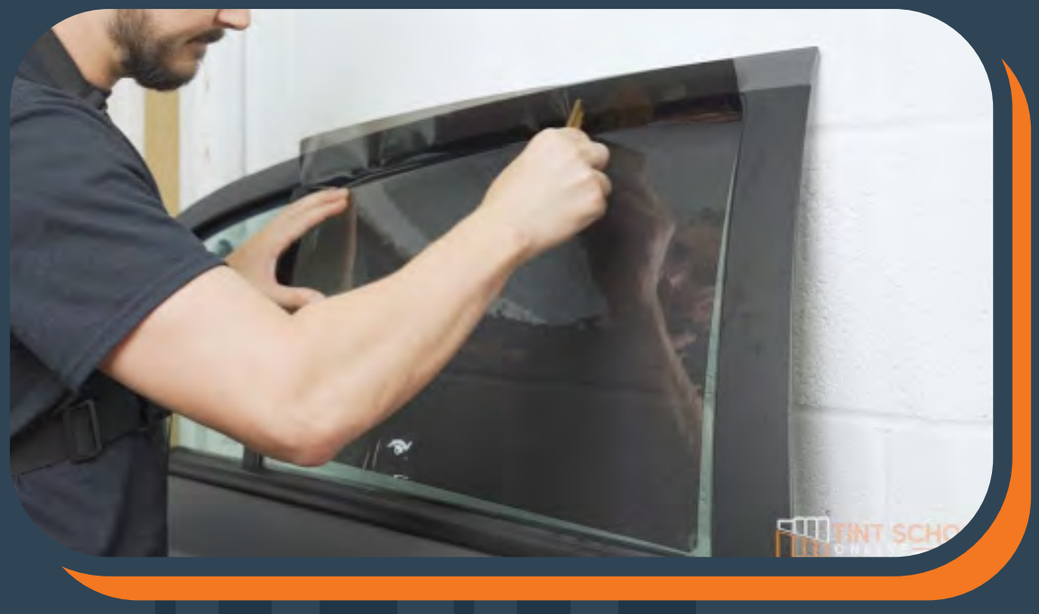

Cut the other side and overlap by ½ cm (This will give you ½ cm overlap each side)

TINT SCHOOL ONLINE

Step 5

Wind the window down 1-3 inches and cut the top using the top edge of the window as a guide

TINT SCHOOL ONLINE

Step 6

Cut (Straighten) the excess film off on all the corners

TINT SCHOOL ONLINE

TINT SCHOOL ONLINE

TUTORIAL

DROP GLASS SHRINKING

*Recommended be used in conjunction with the full in-depth video tutorials where we break down each method used in more detail

WHY?

Shrinking roll down windows is to shape the film to the glass

TINT SCHOOL ONLINE

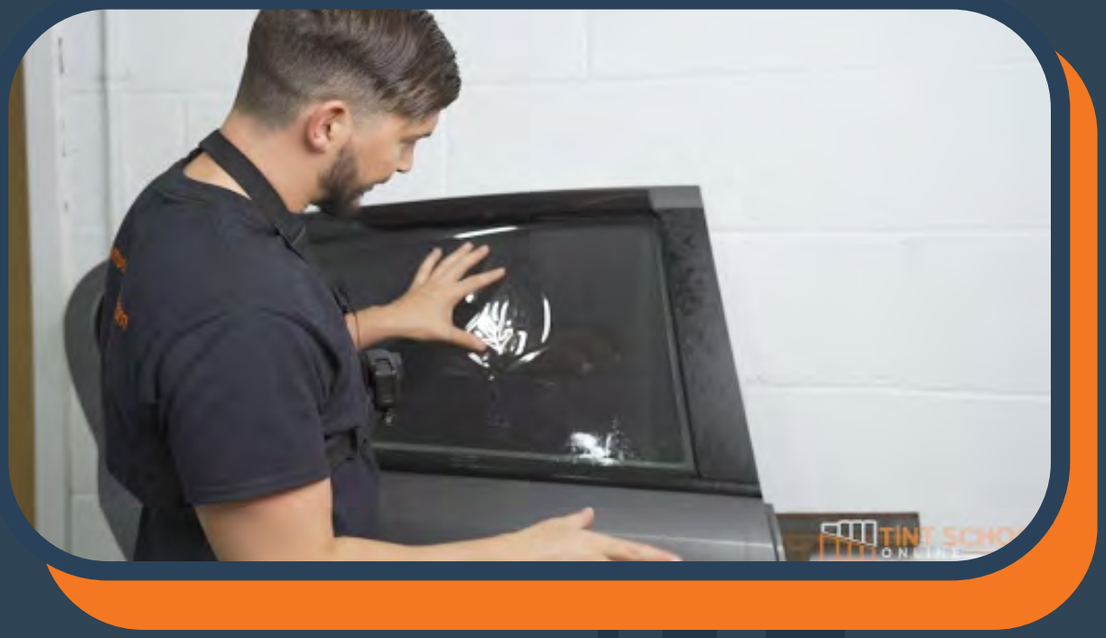

TOOLS NEEDED

- Heat Gun
- Cut Window Film
- Hard Card

TINT SCHOOL ONLINE

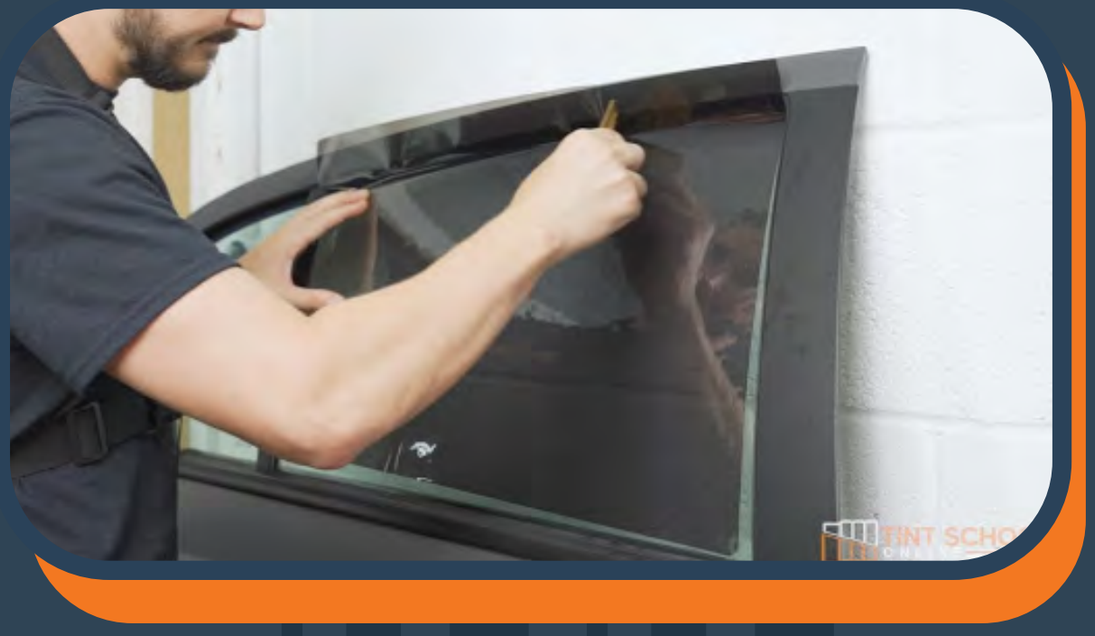

Step 1

Make an ‘n’ shape in the film ready to shrink to bring all the shrink to the bottom

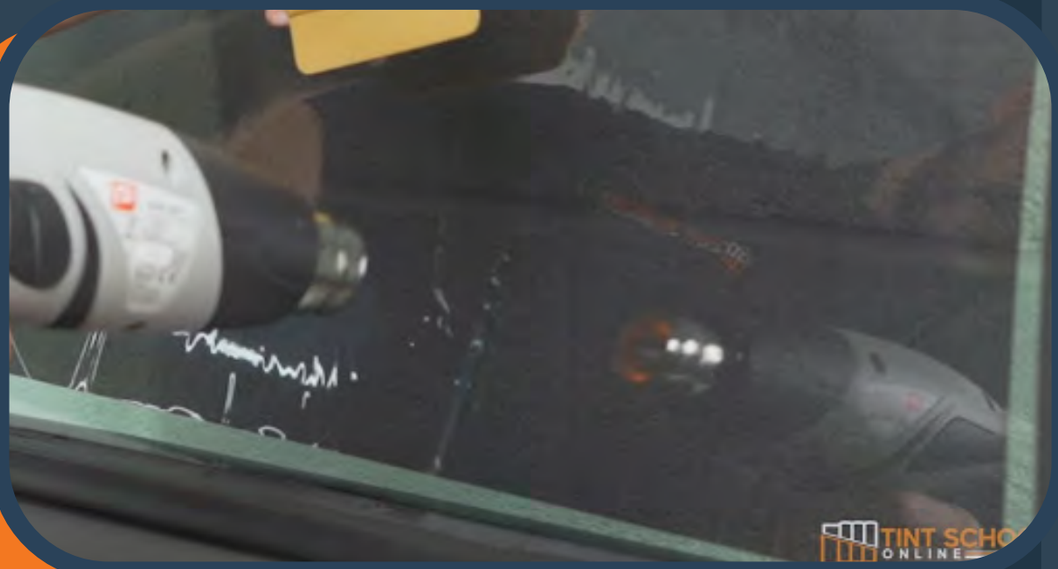

TOP TIP

REMEMBER window film can only be shrunk UP OR DOWN

TINT SCHOOL ONLINE

Step 2

Shrink the fingers down top to bottom until it is flat to the glass

TUTORIAL
PANEL REMOVAL

*Recommended be used in conjunction with the full in-depth video tutorials where we break down each method used in more detail

WHY?

You will be less likely to incur problems with the door panel removed

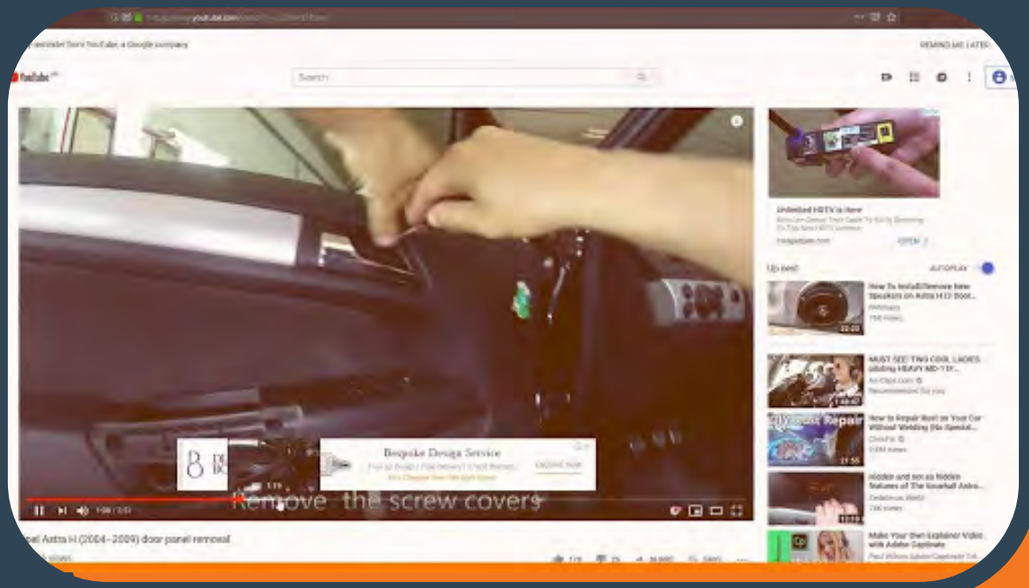

TINT SCHOOL ONLINE

TOOLS NEEDED

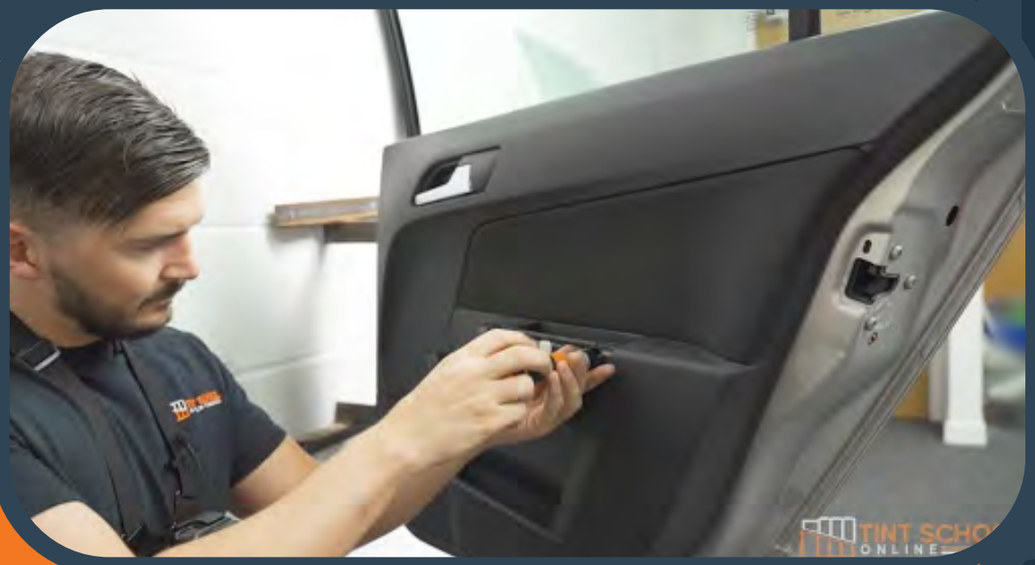

- Panel Pry Tools
- Correct Screwdriver

Step 1

We recommend using Google/Youtube to find relevant tips relating to your panel to help your process

TINT SCHOOL ONLINE

Step 2

Remove any screws holding the door panel on

TINT SCHOOL ONLINE

Step 3

Remove the door panel from the bottom

DROP GLASS CLEANING

*Recommended be used in conjunction with the full in-depth video tutorials where we break down each method used in more detail

TINT SCHOOL ONLINE

TOOLS NEEDED

- Spray Bottle
- Window Cleaner
- Cloth
- EZ Reach
- Single Blade Scraper

TINT SCHOOL ONLINE

Step 1

Spray and scrape the bottom of the window (with the window down 1-3 inches)

Step 2

Eezy reach the bottom-sides to remove grime behind the trim

TINT SCHOOL ONLINE

Step 3

Wind the window down and then scrape the whole window to remove any grime

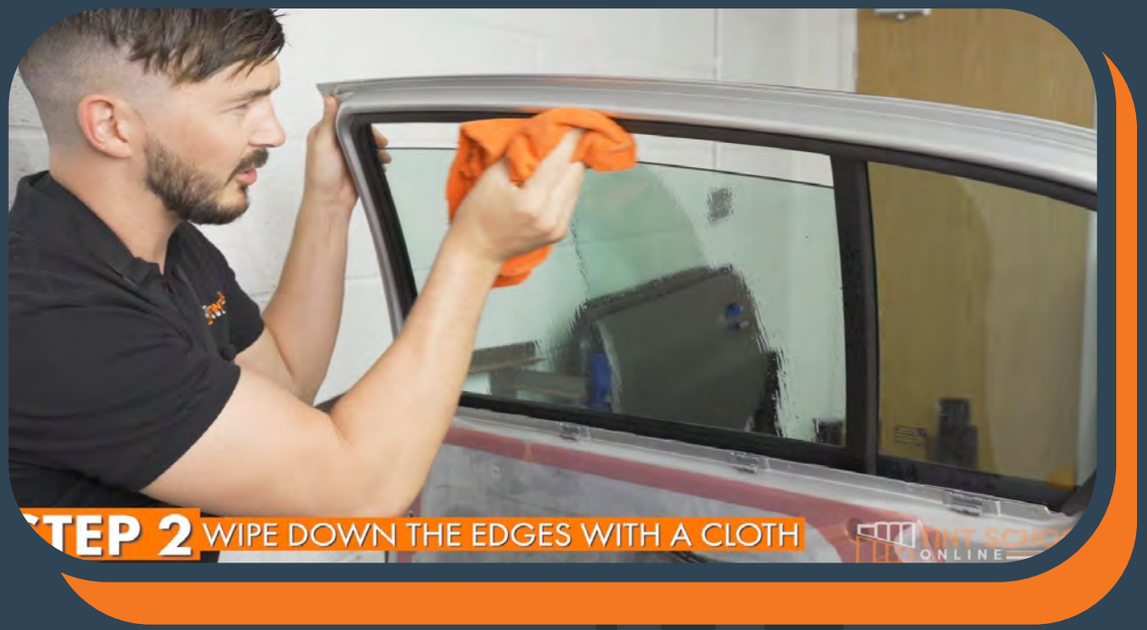

Step 4

Eezy reach the top-sides

TINT SCHOOL ONLINE

Step 5

Wipe the top edge of the glass and the panels and trim surrounding with your cloth

Step 6

Spray the window and clean it with the squeegee

TINT SCHOOL ONLINE

Step 7

Flush the sides and the bottom removing any dust built up behind them

Step 8

Mist the glass with a spray to ensure a good “slip” when the film makes contact

TUTORIAL

APPLYING THE TINT

*Recommended be used in conjunction with the full in-depth video tutorials where we break down each method used in more detail

TINT SCHOOL ONLINE

FREE TUTORIAL AVAILABLE ON YouTube

TOOLS NEEDED

- Spray Bottle
- Hard Card
- Blue Max
- Contour
- Heat Gun

Step 1

Anchor the cut film to panel to it doesn't move when peeling

Step 2

Peel film and spray (Avoid over spraying and bringing in surrounding contamination)

TINT SCHOOL ONLINE

Step 3

Pick film up off the panel

Step 4

Apply film to inside of the window avoiding touching the drame

TINT SCHOOL ONLINE

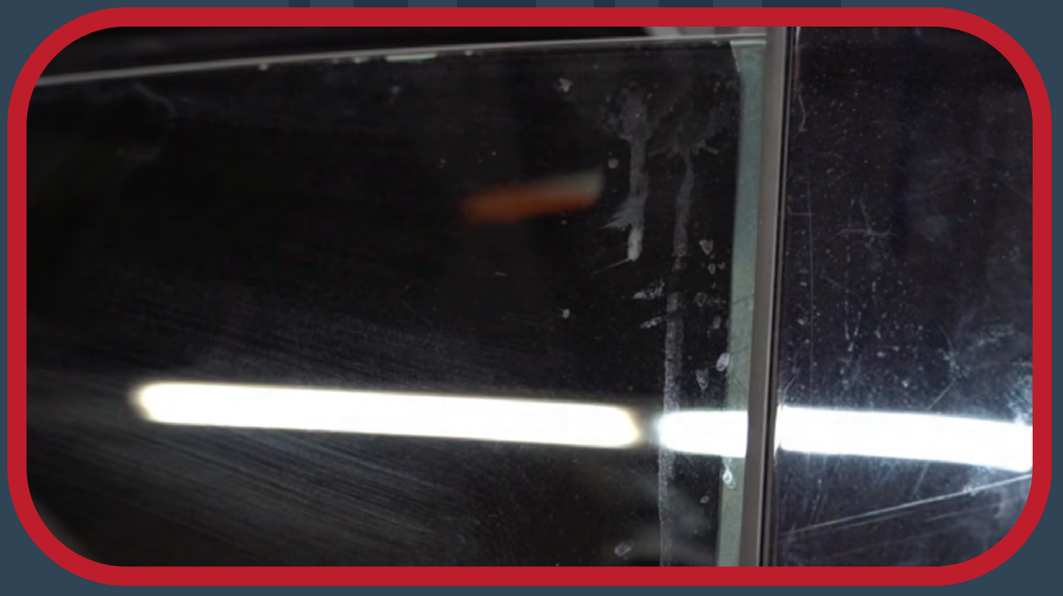

Step 5

Leave a very small gap on top edge of the window

TOP TIP

Check the outside of the window to make sure there are no gaps down the side BEFORE you push the film out

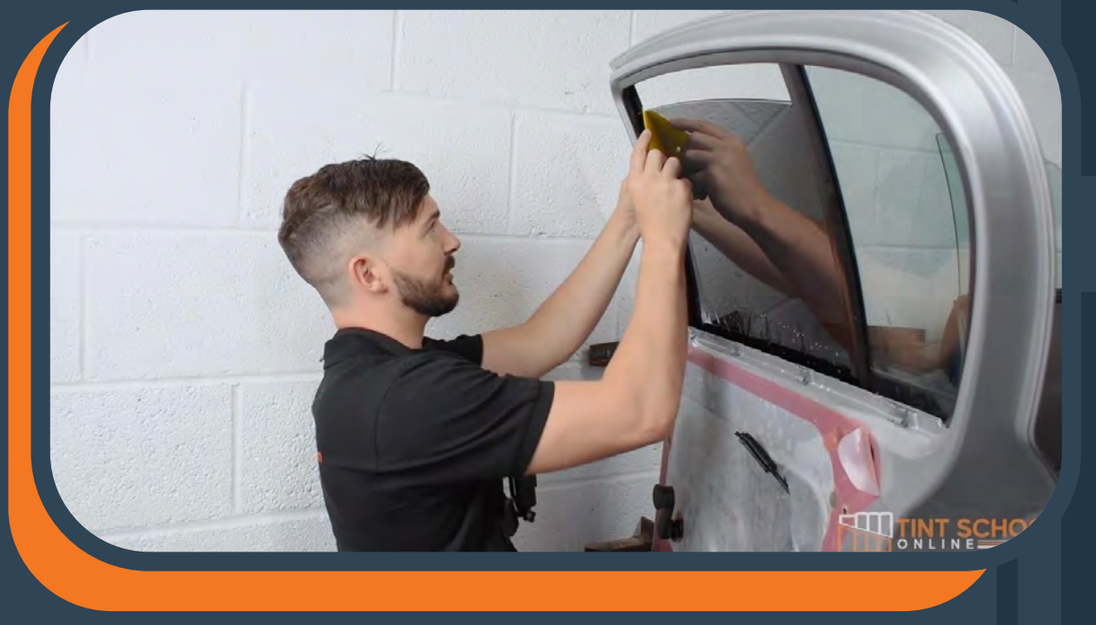

TINT SCHOOL ONLINE

Step 6

Press thumb on tint so it does not move and push liquid out with blue max

Step 7

Use contour to push liquid out from the sides behind the frame

TINT SCHOOL ONLINE

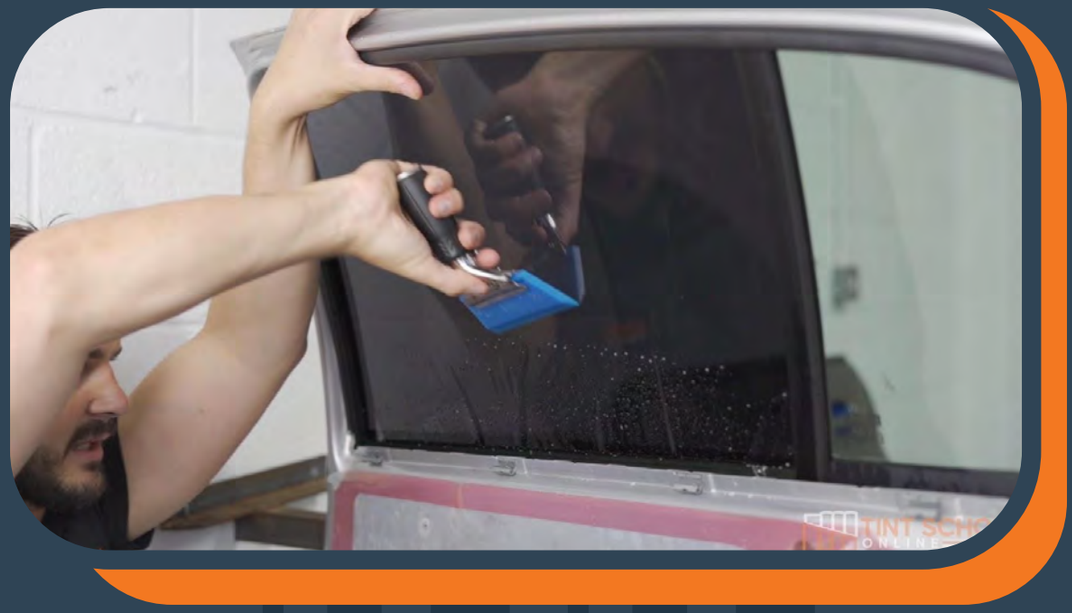

Step 8

Use heat gun and contour to seal top edge

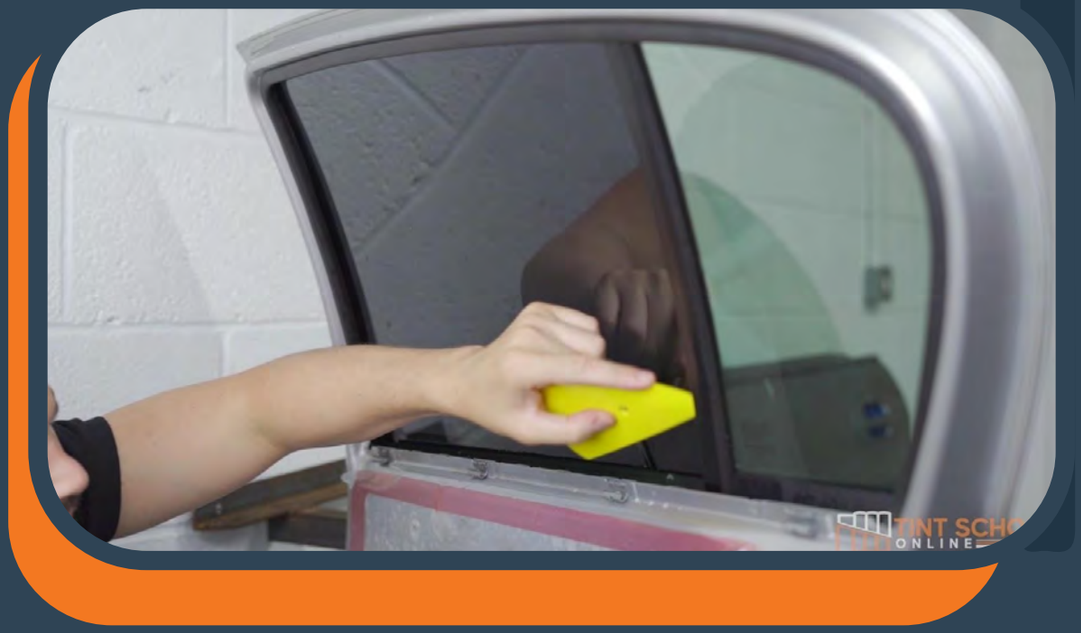

Step 9

Wind the window up and push re-mainder of liquid out at the bottom

TINT SCHOOL ONLINE

Step 10

Push remainder liquid out from sides

Step 11

Seal bottom of tint to the glass

TUTORIAL

REAR SCREEN SHRINK PREP

*Recommended be used in conjunction with the full in-depth video tutorials where we break down each method used in more detail

TINT SCHOOL ONLINE

TOOLS NEEDED

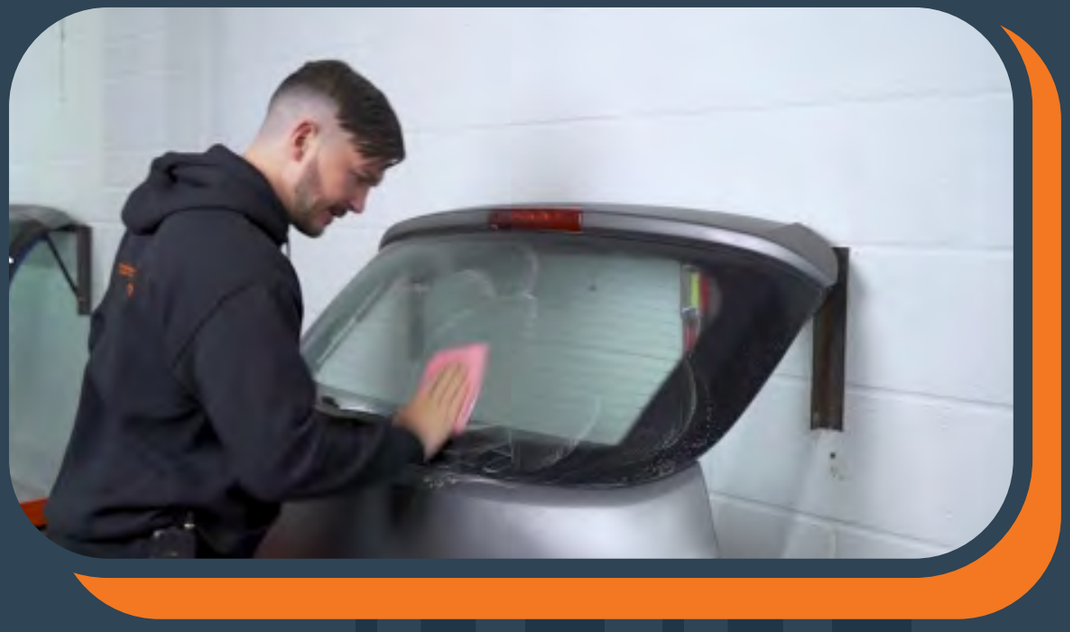

- Spray Bottle
- Window Cleaner
- Cloth
- Knife
- Roll of film
- Hard Card
- Heat Gun

TINT SCHOOL ONLINE

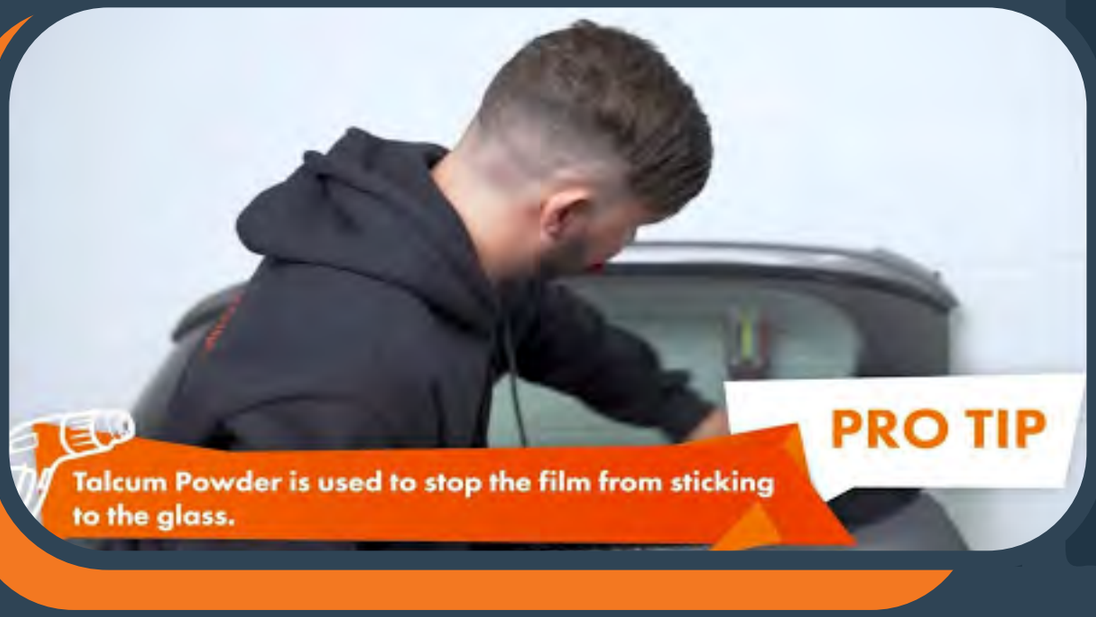

Step 1

Clean the outside of the glass

TINT SCHOOL ONLINE

Step 2

Add talcum powder to the glass (this prevents the film from sticking to the glass and creasing as easy)

Step 3

With your sponge create a wet ‘H’ shape to divide the film into “up and down” shrink

TINT SCHOOL ONLINE

Step 4

Unroll tint on glass with overlap

TINT SCHOOL ONLINE

Step 5

Lift up one side of the film at a time and create the “H” pattern which will separate your film into up and down shrink

(The water we placed with the “H” before will help it stick)

TINT SCHOOL ONLINE

Step 6

Cut the film past the dot-matrix all the way around by around 2 inchs and around the wiper if it is in the way

TINT SCHOOL ONLINE

Always remember

Keep your corners straight and not rounded, this will make it easier to shrink

TUTORIAL

Shrinking Rear Screen

*Recommended be used in conjunction with the full in-depth video tutorials where we break down each method used in more detail

TINT SCHOOL ONLINE

TOOLS NEEDED

- Spray Bottle
- Prepped film
- Hard Card
- Heat Gun

TINT SCHOOL ONLINE

Tip 1

Shrink the window working with side to side motions and staying to a horizontal line all the way across

TINT SCHOOL ONLINE

Tip 2

Slowly keep working your way down. Breaking each part down bit by bit.

Find your Shrink line

Knowing that will help aid your success in identifying where you are shrinking and why

TINT SCHOOL ONLINE

Tip 3

Use your hands/index finger BEFORE you use the card to break down the fingers and prevent “steam roller creases”

TINT SCHOOL ONLINE

Tip 4

Look out for “hammer heads” where the fingers separate like a hammer - ALWAYS break these down into single fingers by running your finger down the middle

TINT SCHOOL ONLINE

Tip 5

If you see a “Bannana” shape in your film DO NOT HEAT IT. You need to use your hand to straighten it

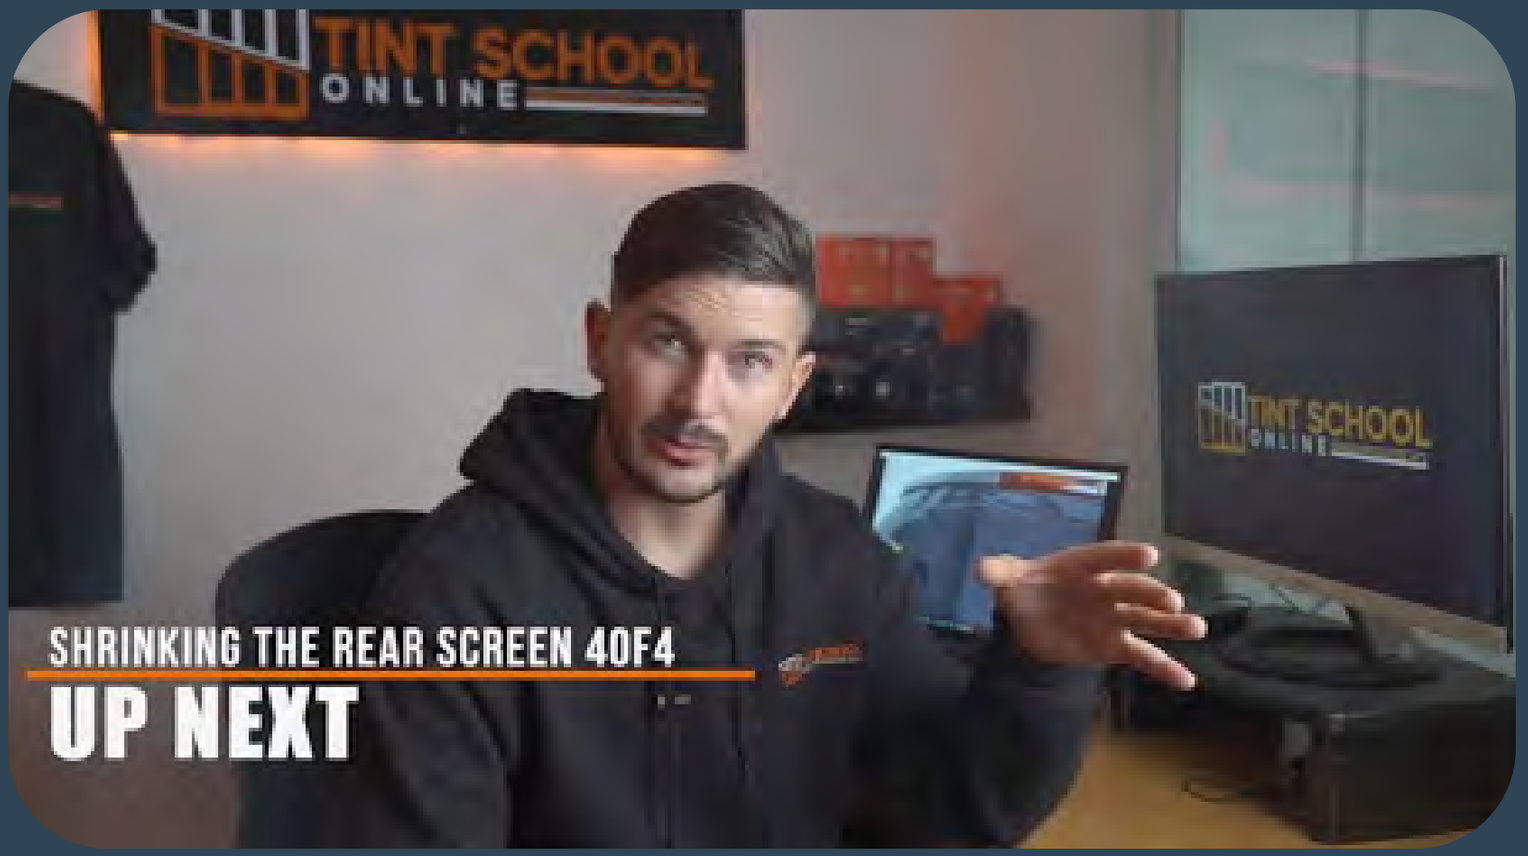

TINT SCHOOL ONLINE

Tip 6

Know where your line is to predeter-mine how far a shrink must go

FINAL CUT REAR WINDOW

*Recommended be used in conjunction with the full in-depth video tutorials where we break down each method used in more detail

TINT SCHOOL ONLINE

TOOLS NEEDED

- Knife
- Shrunk Film
- Hard Card
- Ezey Reach

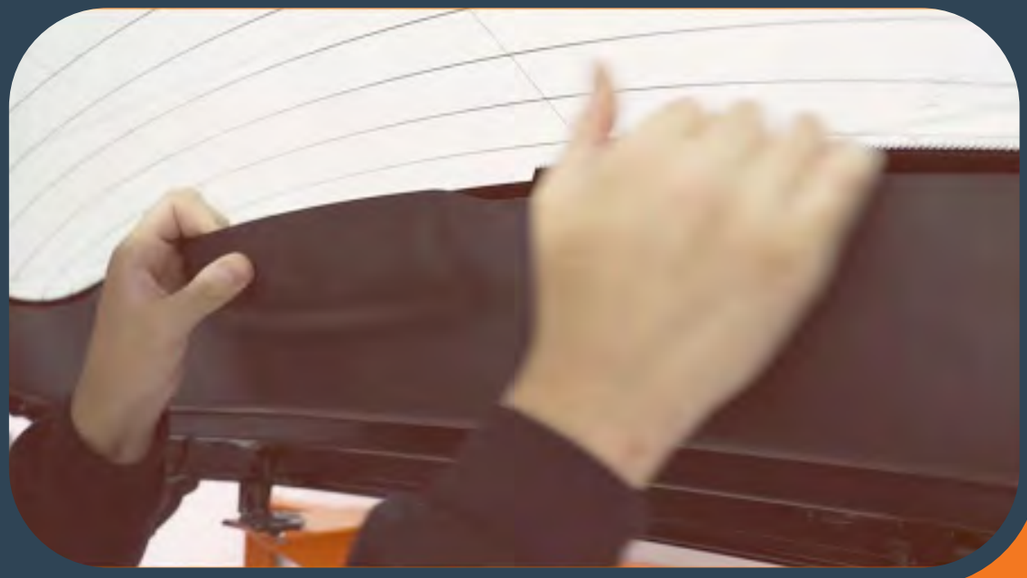

TINT SCHOOL ONLINE

Step 1

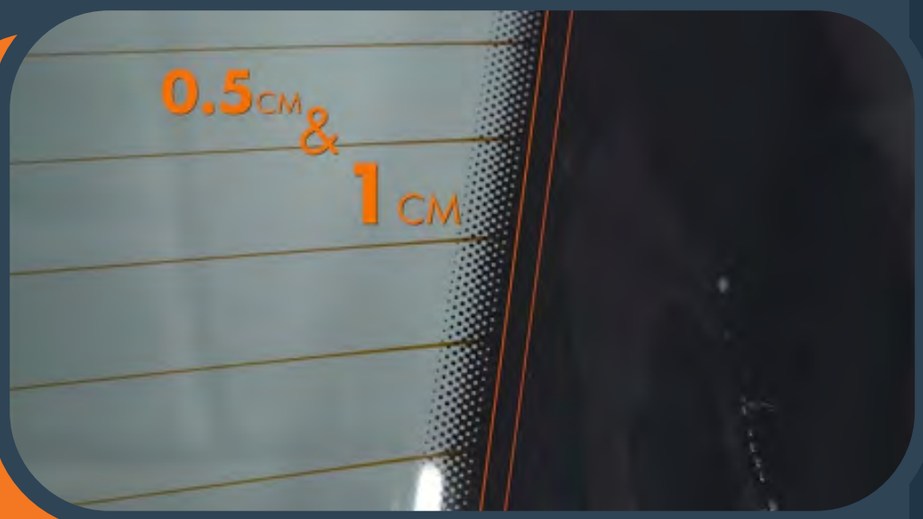

Check around inside edges to see how much room you have.

Remove panels if required

TINT SCHOOL ONLINE

Step 2

Aim for the
ideal cutting
size like on the picture

TOP TIP

If the film is NOT cutting, DO NOT press harder. Please change your blade to prevent damaging the glass

TINT SCHOOL ONLINE

Step 3

Place the cut film on a clean door panel ready to peel

CLEANING REAR SCREEN (HATCHBACK)

*Recommended be used in conjunction with the full in-depth video tutorials where we break down each method used in more detail

TINT SCHOOL ONLINE

TOOLS NEEDED

- Spray Bottle
- Window Cleaner
- Scrub pad
- Cloth

TINT SCHOOL ONLINE

Step 1

Spray outside of glass and wipe down

TINT SCHOOL ONLINE

Step 2

Quick Clean inside of glass

Check for any glue marks on the glass

TINT SCHOOL ONLINE

Step 3

Using a stainless steel scrub pad

Scrub the inside of the glass

TINT SCHOOL ONLINE

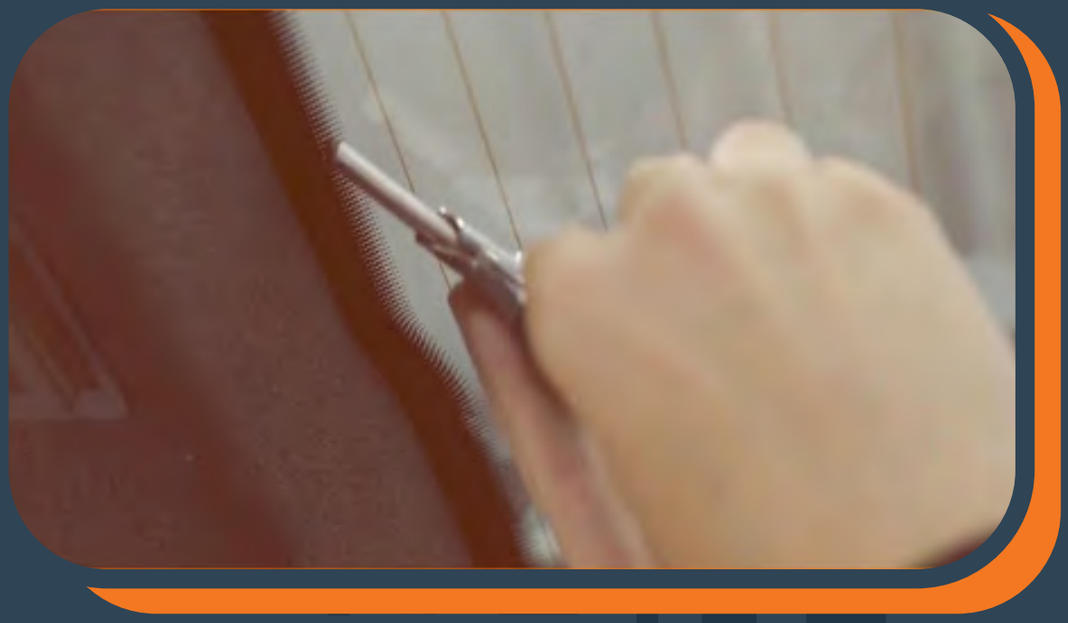

Step 4

Wipe panels with a clean cloth which

TINT SCHOOL ONLINE

Step 5

Using your window cleaner, clean the window side to side (ensure there is a mist of water on the glass - this will help the window cleaner glide better)

TINT SCHOOL ONLINE

Step 6

Flush sides and bottom (NOT THE TOP)

Then respray center with a light mist to prevent the film sticking

TUTORIAL
INSTALLATION (HATCHBACK)

*Recommended be used in conjunction with the full in-depth video tutorials where we break down each method used in more detail

TINT SCHOOL ONLINE

TOOLS NEEDED

- Spray Bottle
- Shrunk film
- Contour
- Heat Gun

TINT SCHOOL ONLINE

Step 1

Peel the backing sheet and spray as you go down being sure to get full coverage on all of the window film

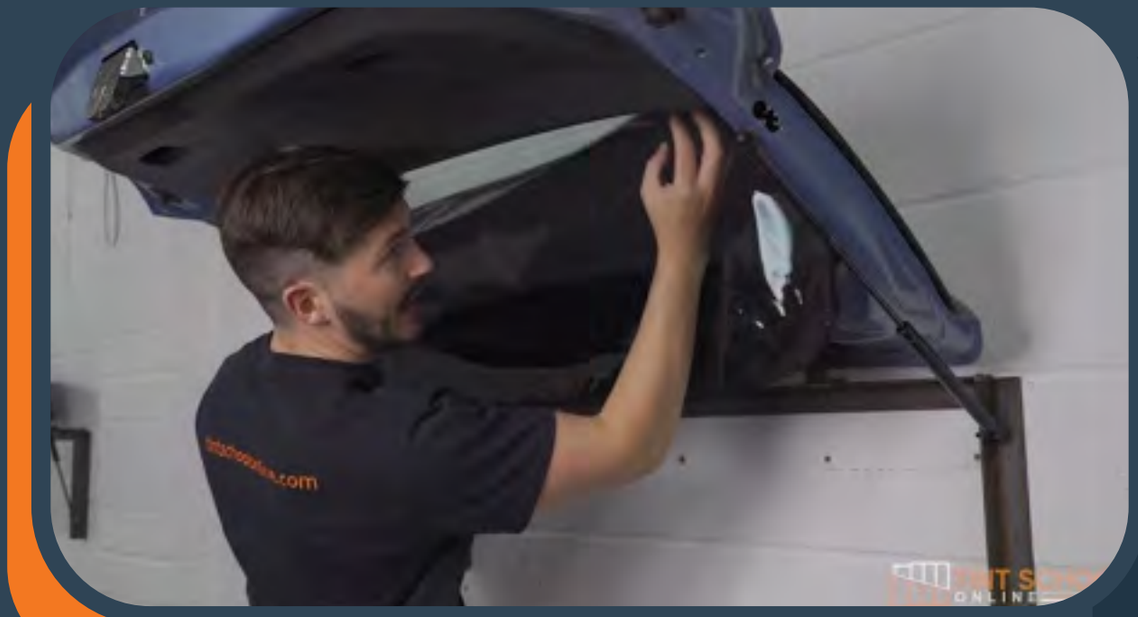

TINT SCHOOL ONLINE

Step 2

ALWAYS apply the top of the film first when placing on a hatchback window

TINT SCHOOL ONLINE

Step 3

Check the edges to make sure there is no visible light gaps showing

TINT SCHOOL ONLINE

Step 4

Spray the whole window and smooth down with hands to ensure the film is evenly spread

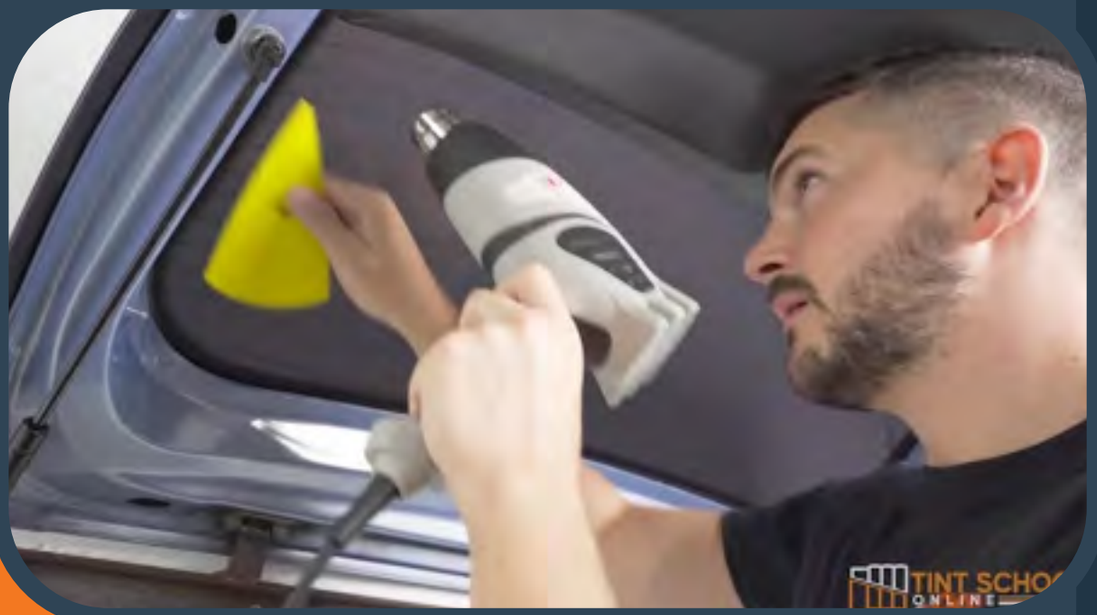

TINT SCHOOL ONLINE

Step 5

With the Blue max push the film out EVENLY

TINT SCHOOL ONLINE

Step 6

Using a heat gun and contour, heat seal the edges down

TUTORIAL

SEDAN REAR SCREEN

*Recommended be used in conjunction with the full in-depth video tutorials where we break down each method used in more detail

TINT SCHOOL ONLINE

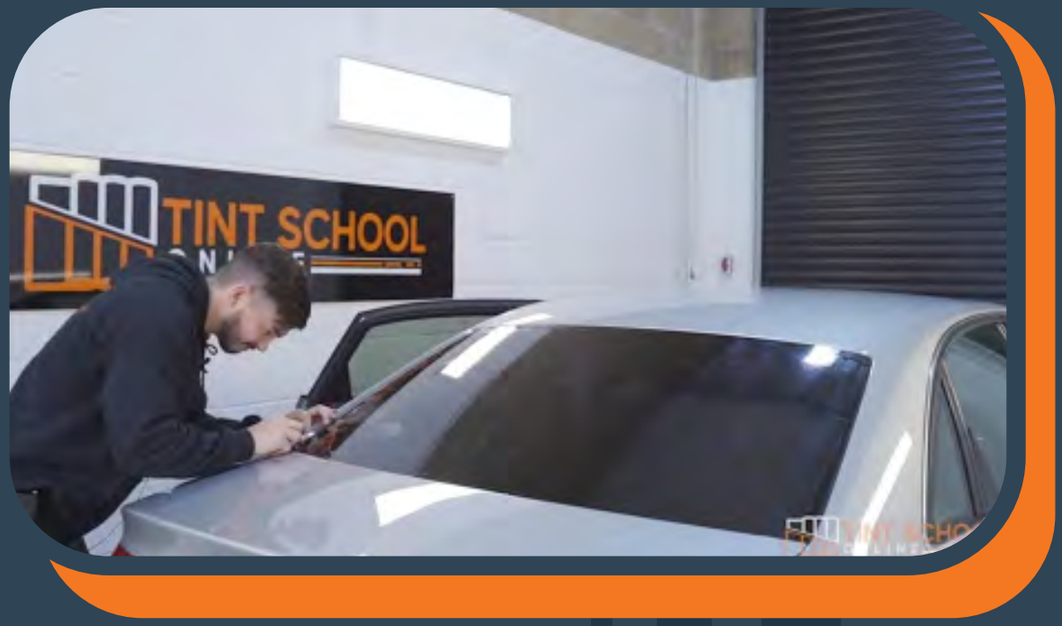

TOOLS NEEDED

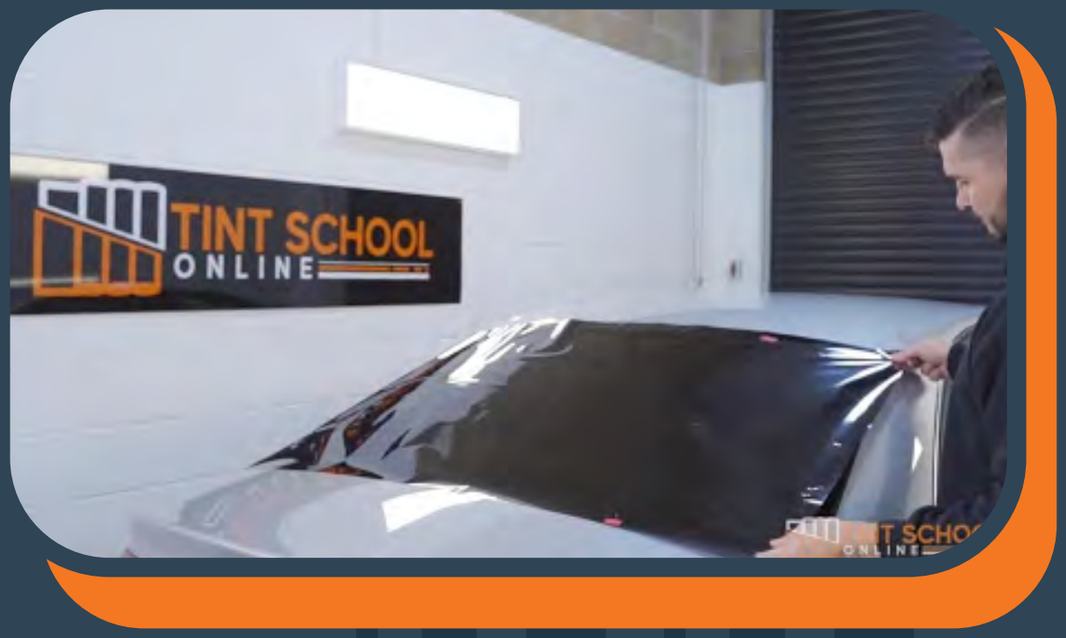

- Spray Bottle
- Window Cleaner
- Cloth
- Knife
- Roll of film
- Scrub pad
- Hard Card
- Side swipe
- Blue max
- Heat Gun

TINT SCHOOL ONLINE

Step 1

Prep back window. Clean, shrink and cut as shown in previous rear window shrinking tutorials

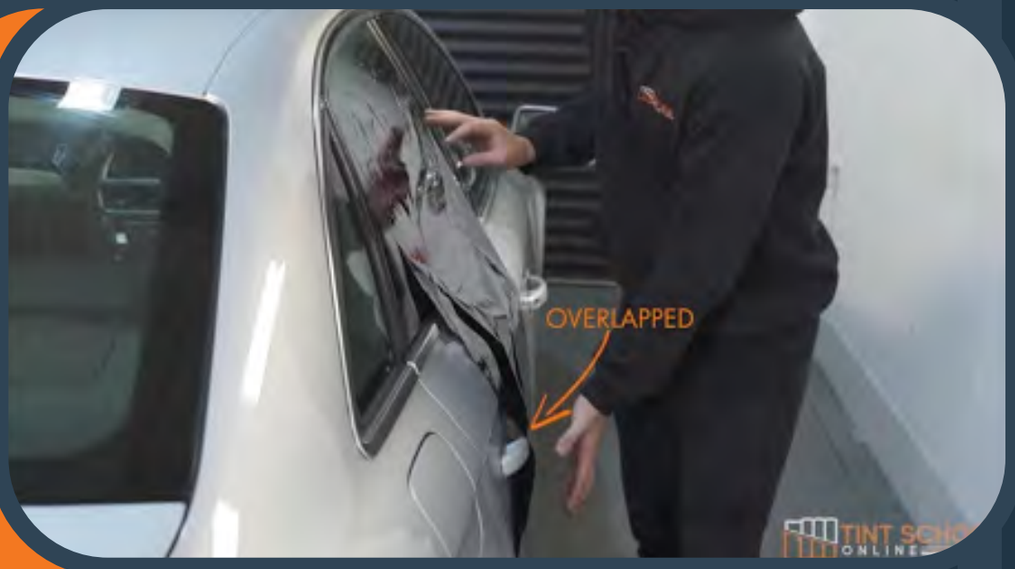

TINT SCHOOL
ONLINE

Step 2

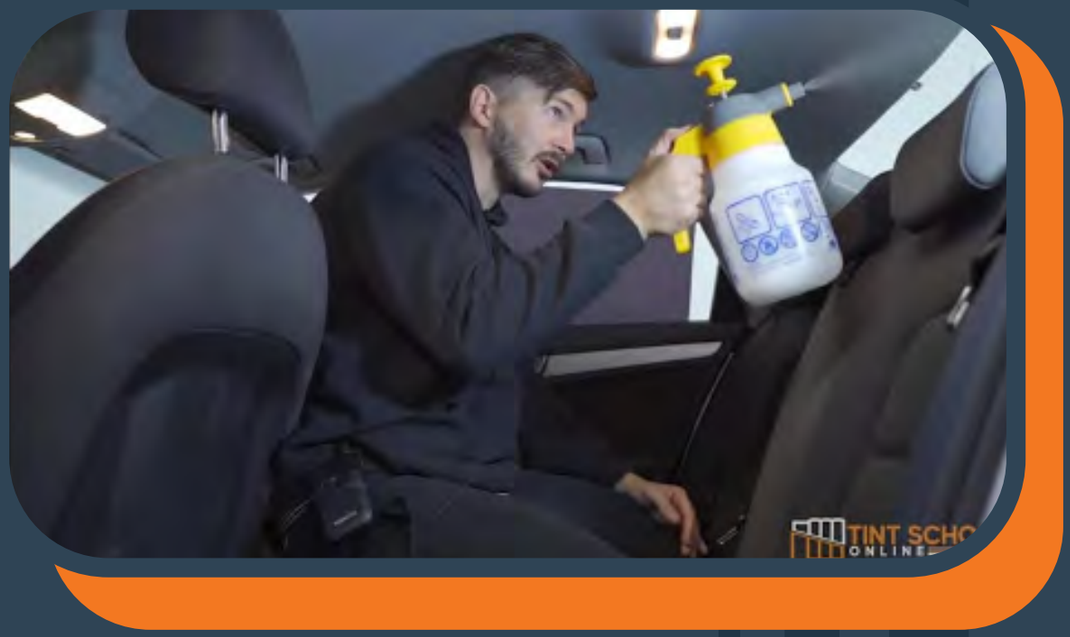

Prep side door and place shrunk film on top

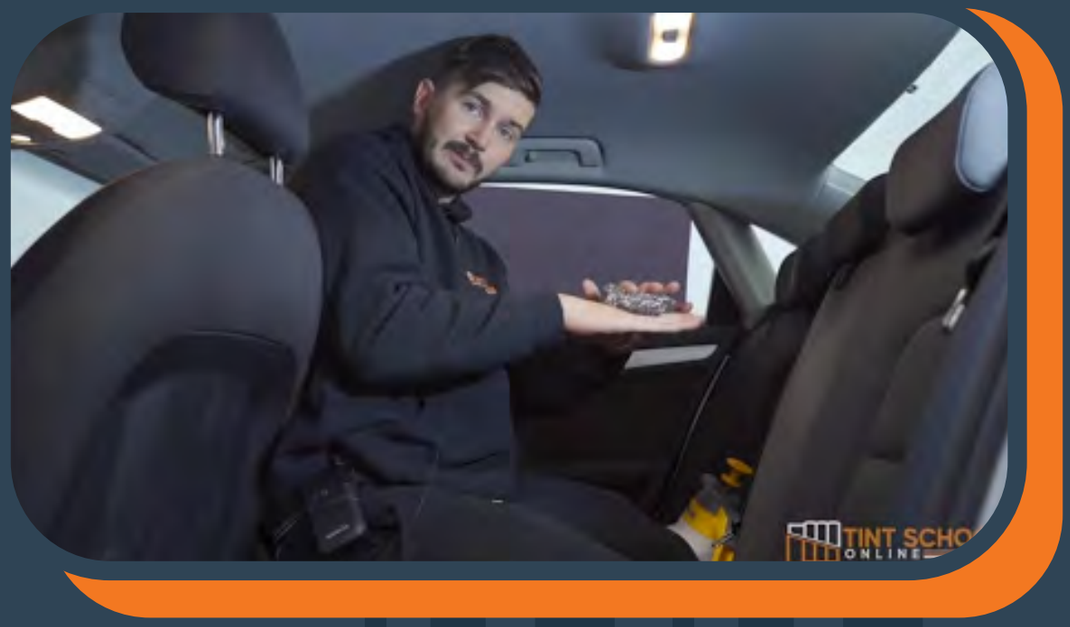

TINT SCHOOL ONLINE

Step 3

When inside the car spray the entire back window

Scrub down the inside of the rear window with your stainless steel scrub pad on the top side of your hand

TINT SCHOOL ONLINE

Step 4

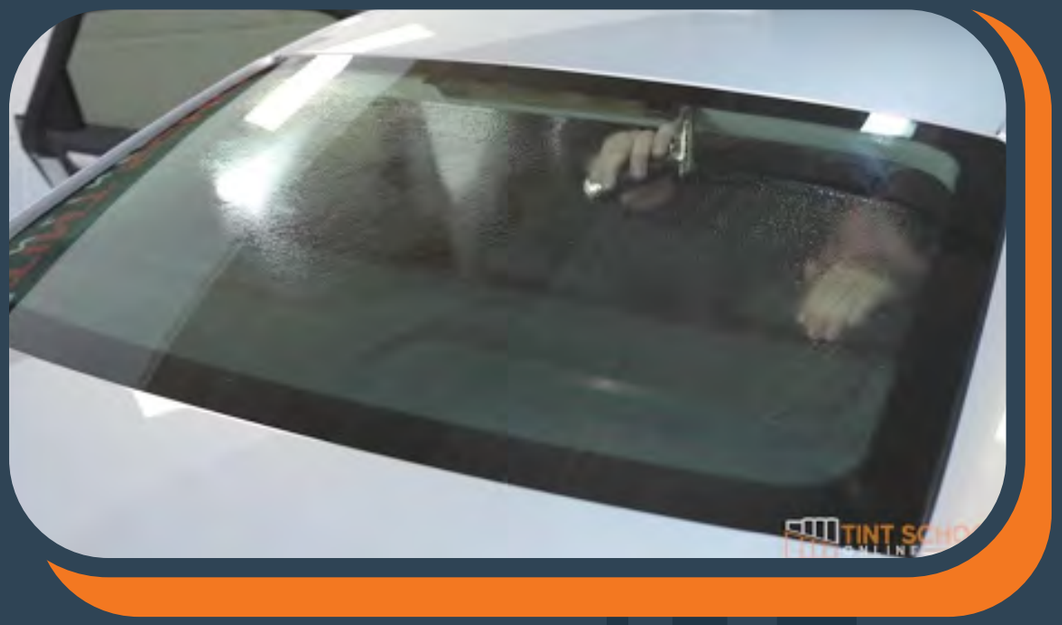

In the hard to reach areas, place your scrub pad on your bulldozer to help you reach them

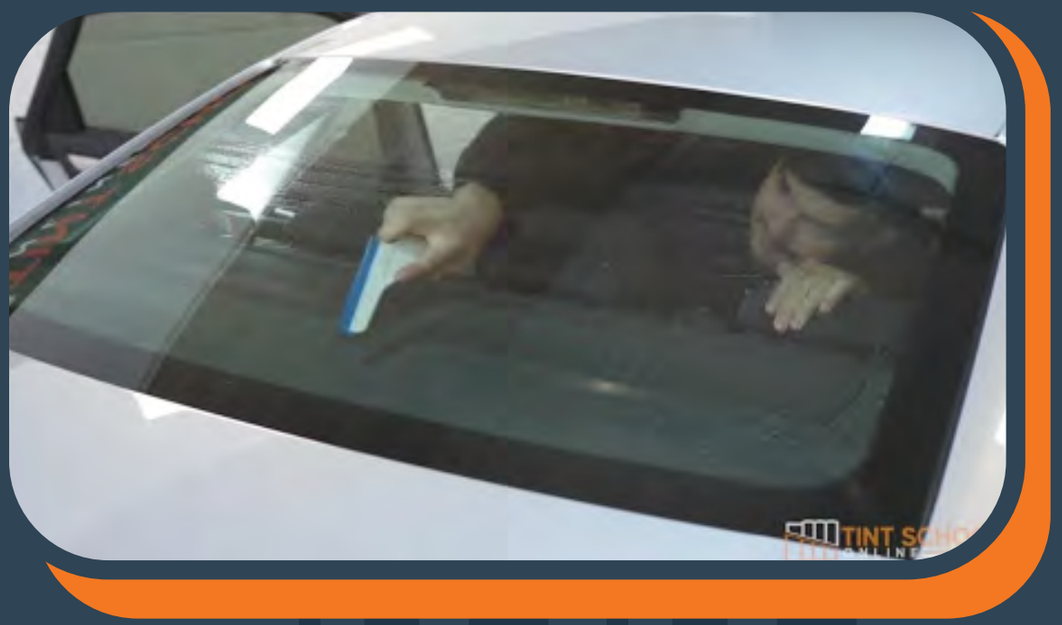

TINT SCHOOL ONLINE

Step 5

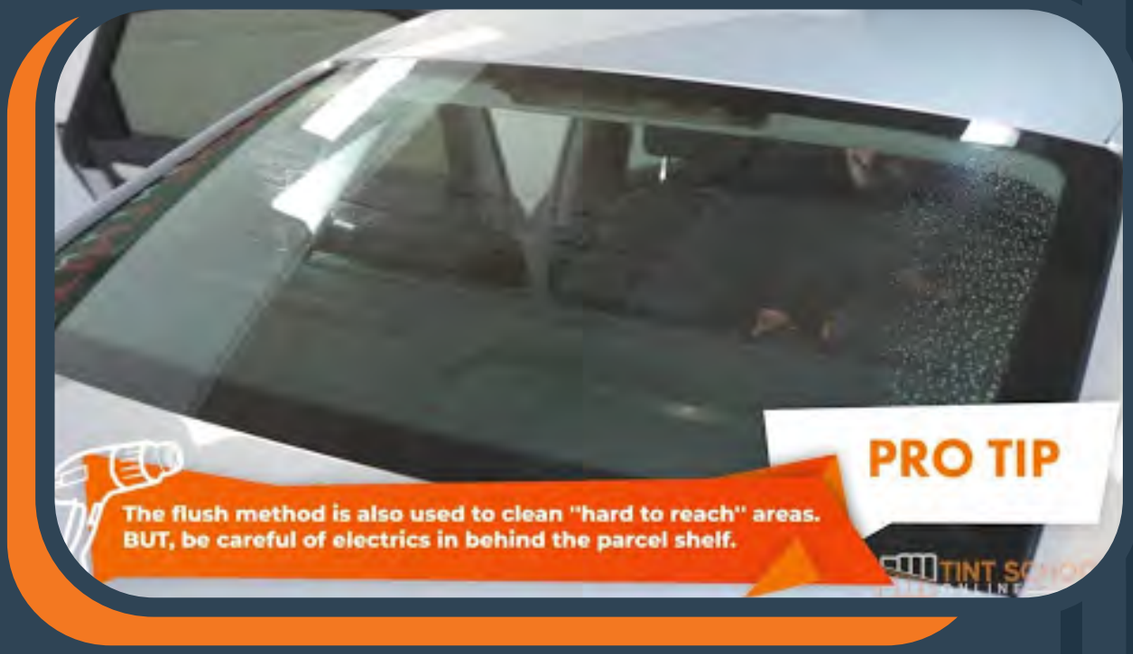

Clean with window cleaner starting from the top with your window cleaner

For bottom half where you can not reach, use the side swipe to clean

TINT SCHOOL ONLINE

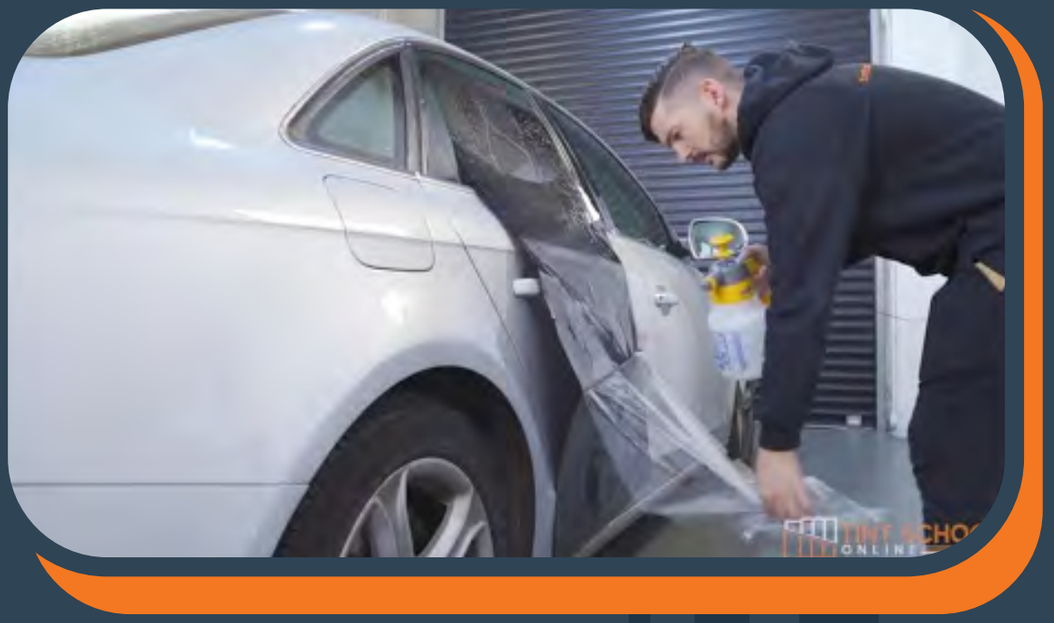

Step 5

Flush the sides and the bottom around the edges

TINT SCHOOL ONLINE

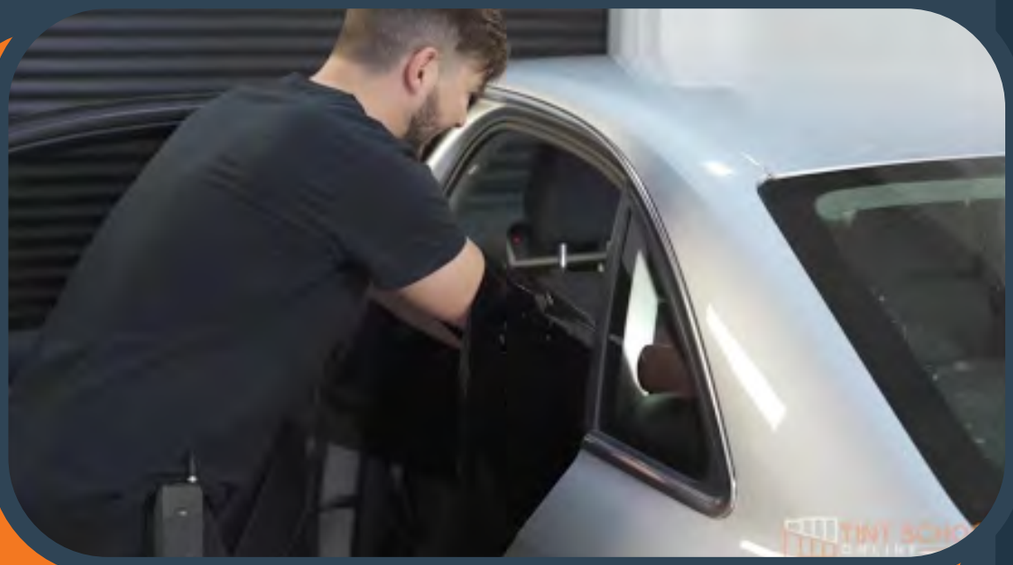

Step 6

Remove the backing sheet from the window film and hold the peeled window film using the “M” method we explained the video

TINT SCHOOL ONLINE

Step 7

Take the film inside the car with the window film infront of you and be careful not to touch anything

TINT SCHOOL ONLINE

Step 8

Sit in the middle of the seats and ensure you are comfortable before installing the window film

TINT SCHOOL ONLINE

Step 9

Make sure the bottom half of the film is OPENED up and make the bottom make contact first while the top is hanging over arms

Slide film down slowly while checking surrounding areas to make sure it is not touching the sides

TINT SCHOOL ONLINE

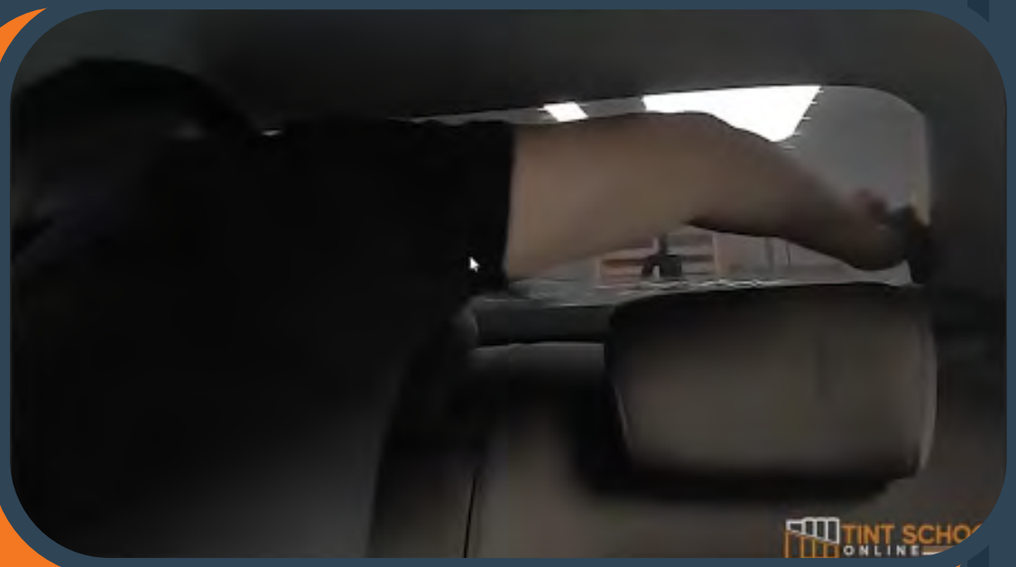

Step 10

Use your hands to smooth the window film out as much as possible before you use your bluemax

TINT SCHOOL ONLINE

Step 11

Use your blue max and side swipe to EVENLY smooth out the window film

Then clean the outside of the glass and rectify any potential problems using the previous guide

TUTORIAL

CARGO WINDOWS

*Recommended be used in conjunction with the full in-depth video tutorials where we break down each method used in more detail

TINT SCHOOL ONLINE

TOOLS NEEDED

- Spray Bottle
- Window Cleaner
- Cloth
- Knife
- Roll of film
- Hard Card
- Blue max
- Squeegee
- Heat Gun

TINT SCHOOL ONLINE

Step 1

Clean the glass down ready to lay the window film

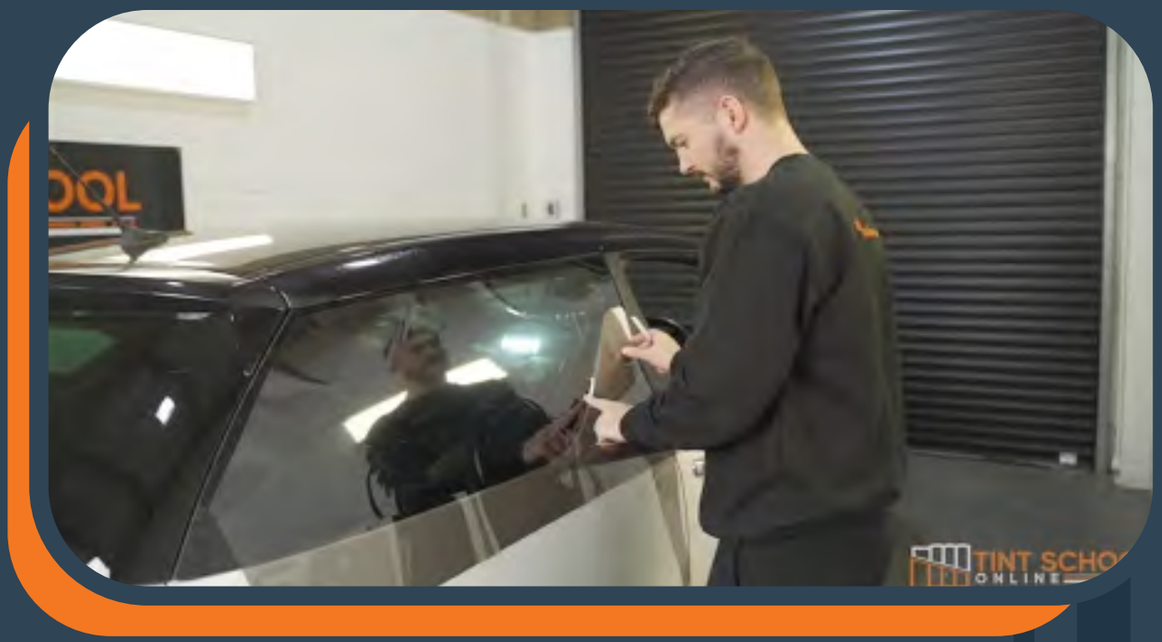

TINT SCHOOL ONLINE

Step 2

Rough cut the window film around the edge of the window

Step 3

Make a ‘H’ for shrink prep. The aim is for spears to be at the top and bottom and then shrink the film until its flat

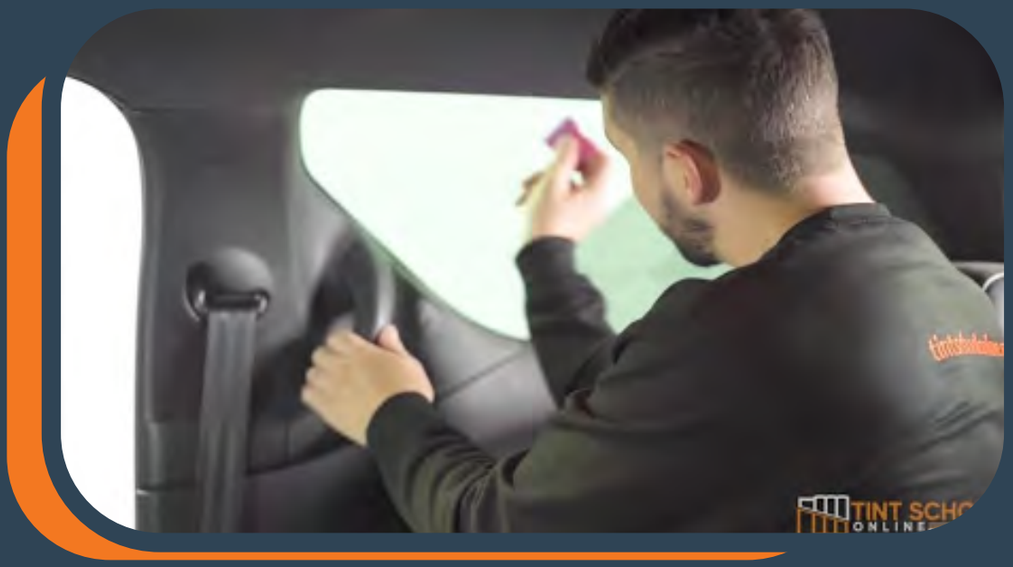

TINT SCHOOL ONLINE

Step 4

Make your final cut around the edge of the window after checking how much room you have.

TINT SCHOOL ONLINE

Step 5

Clean the inside of the glass using the same methods as the roll down windows

1. Spray
2. Scrape
3. Wipe edges with Cloth

TINT SCHOOL ONLINE

Step 6

Use your yellow turbo squeegee to clean the window ensuring the dirty water runs out at the bottom

TINT SCHOOL ONLINE

Step 7

Re-mist the window and then peel the backing sheet from the window film

Step 8

When applying film insert bottom end of film in first like on the image shown.

Once in place on the bottom, proceed to push the top in place

Step 9

Using the turbo squeegee push liquid out starting from the top edge working your way down

Step 10

Spray film again and finish pushing out tint with a blue max.

Use a contour to remove remaining liquid around the edges to fully seal to the glass
